

## ENEL DISTRIBUCIÓN CHLE STATEMENT

Enel Distribución is fully satisfied with the Ministry of Energy's decision not to proceed with the concession revocation process. Chile is a strategic market for the Group, and in recent years, significant investments have been made in the distribution network to strengthen its resilience and improve response times in emergency situations. Enel Distribución will continue, as it has always done, to invest steadily in this area, with the goal of building an increasingly resilient network that is prepared to face the extreme weather events associated with climate change.
