

2021-2023 Sustainability Plan

Municipality of Ollagüe – Pabellón Hill Geothermal Plant

SDGs	Activities	Targets 2023	Work Streams	Actions	Projects	Type	KPI	2020	Accumulated 2015_2020
	Affordable, reliable, sustainable and modern energy	411,000 beneficiaries accumulated since 2015	Energy: Access, quality, security and efficiency	This project seeks to contribute to the development and improvement of the quality of life of communities located in the areas of interest of their projects, meeting the communities' basic needs, such as 24/7 access to electricity in the homes of the area's inhabitants, managing to promote the material, spiritual and social progress of its members and future generations, creating conditions to improve their quality of life. As part of the project our line of work stems from the line of social materiality of the project such as support for the development of local communities and responsible relationships with communities around our operations.	Electrification of Cupo ¹	CSR	Beneficiaries		-

 	Affordable, reliable, sustainable and modern energy	411,000 beneficiaries accumulated since 2015			Electrification of Conchi Viejo ¹	CSR	Beneficiaries		-
 	Sustained, inclusive and sustainable economic growth	447,000 beneficiaries accumulated since 2015	Economic development with local identity and Green jobs	Community sustainable tourism is a type of tourism that incorporates cultural, social and economic aspects into its supply and demand for goods and services. It also seeks to add economic and social value to the local space or place where it is undertaken, and it focuses on people traveling with the intention of carrying out tourist activities that allow them to get closer to and comprehend different cultures. That is to say, get to know the lifestyles, customs, traditions, festivities, history, architecture, and monuments of the place they visit. UNESCO indicates that Cultural Tourism corresponds to a "cultural dimension in socio-economic processes aimed at achieving lasting development of peoples" as a "model of integral and sustainable human development". According to this premise, the materiality of our project supports the development of the indigenous communities of Ollagüe, Toconce and Caspana.	CID Community Sustainable Tourism Program	CSV	Beneficiaries		91
	Sustained, inclusive and sustainable economic growth	447,000 beneficiaries accumulated since 2015		Community benefit agreements are agreements established between the company and communities that inhabit the project influence area. Such communities are recognized by the relevant authority and the bilateral agreements obtained are subject to the project's Environmental Qualification Resolution (RCA by its Spanish acronym). The objective of these agreements is to help the communities in achieving social development in a responsible way to obtain greater opportunities for the growth of local inhabitants.	Cupo Community project funding	CSV	Beneficiaries		520
	Sustained, inclusive and sustainable economic growth	447,000 beneficiaries accumulated since 2015		The benefit agreement with the Ollagüe indigenous community helps to develop different projects aimed at improving community infrastructure, health, education, entrepreneurship, and sustainable tourism. This community, through community assemblies, votes for the different projects to be implemented each year and the Company establishes all auditable safeguards to protect the correct development of the different projects.
