11	Make cities and human settlements inclusive, safe, resilient and sustainable		Housing, services and environment	This line of projects is developed under two sub-areas "housing" and "services and environment". With regard to housing, the projects improve housing conditions for neighbors residing in rural sectors. The aim is to address housing-related gaps that have an important impact on multidimensional poverty indicators in the region and the municipality. The projects consist of a housing improvement plan that includes providing economic resources to implement basic services improvements (sanitary, electrical systems connections, drinking water and/or housing structures). Regarding the environment, the projects improve community infrastructure conditions and contribute to the recovery of public spaces by constructing projects of neighbors' meeting places and other similar venues.
