Habitats affected

Terrestrial ecosystems

Aquatic ecosystems

Species involved

Amphibians and reptiles

Rolex Award 2016 – Chile

Vreni Häussermann, since 2003 director of the Huinay science station, supported by the Catholic University of Valparaíso and by Enel, in 2016 won the Rolex Award for Enterprise, which is given to five main winners and five youth winners who have demonstrated that they have the passion, the determination and, above all, the enterprising spirit needed to make the world a better place. In particular, Vreni Häussermann is exploring the fjords of the Chilean Patagonia to document the mysterious life of the marine depths. It is a project half-way between scientific research and divulgation, which seeks to create public support for the conservation of the area with its unique and tremendously rich biodiversity.

Sound governance

Conflict of interest Policy

Policy on Conflict of Interest was issued and published

Code of ethics Ethical channel

Defines unethical conducts and the core values that all workers and stakeholders of the Company have to respect.

Model of prevention of criminal risks

Model of prevention of criminal risks, which establishes a system of control to prevent crimes such as money laundering, financing of terrorism, etc..

Zero tolerance plan against the corruption

Program to combat this practice called the **Zero Tolerance Plan** against Corruption (TCC), in which identifies the activities most exposed to such risks (donations to political parties; Charities and sponsorships; treats of favor and gifts; accommodation and expenses).

Governance standards to safeguard the shareholders interests

Thank you

Disclaimer

This presentation contains statements that could constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements appear in a number of places in this announcement and include statements regarding the intent, belief or current expectations of Enel Chile and its management with respect to, among other things: (1) Enel Chile's business plans; (2) Enel Chile's cost-reduction plans; (3) trends affecting Enel Chile's financial condition or results of operations, including market trends in the electricity sector in Chile or elsewhere; (4) supervision and regulation of the electricity sector in Chile or elsewhere; and (5) the future effect of any changes in the laws and regulations applicable to Enel or its subsidiaries. Such forward-looking statements are not guarantees of future performance and involve risks and uncertainties. Actual results may differ materially from those in the forward-looking statements as a result of various factors. These factors include a decline in the equity capital markets of the United States or Chile, an increase in the market rates of interest in the United States or elsewhere, adverse decisions by government regulators in Chile or elsewhere and other factors described in Enel Chile's Annual Report and Form 20-F. Readers are cautioned not to place undue reliance on those forward-looking statements, which state only as of their dates. Enel Chile undertakes no obligation to release publicly the result of any revisions to these forward-looking statements.
